

RO Dashboard — What's New

Updates released June 18, 2026 · All changes are live now

Here's everything we just added and fixed on the dashboard. Take a minute to read through — a couple of these change how things look on your screen.

- **Flip through photos with your arrow keys**

When you open a photo to look at it, you can now tap the **left and right arrow keys** to jump to the next or previous photo, and the **Esc** key closes it. No more clicking each picture one at a time.

- **Parts + freight total when finishing a ticket**

Open **Manage Parts** on any RO and you'll see a new **"Ticket Totals"** bar at the bottom. It adds up your parts cost, your freight charges, the two together (your total cost), and the retail total — so you don't have to add it up by hand when closing a ticket.

- **"Total RVs" now tells you how many are actually here**

The count at the top used to mix in units that aren't on the lot yet. It now shows a clear **"on lot"** number, so you know how many RVs are physically at the shop.

- **Scheduled units no longer counted as "here"**

If a unit is set to **Scheduled** (the customer is bringing it in later), it no longer gets counted as being on the lot. The on-lot number now only counts RVs that are really here.

- **New "Pickup / Completed Date"**

Every RO now has a spot to record **when the unit was picked up / left the lot**. You'll find it on the New RO form and the Edit RO form. This helps us keep records of when jobs actually finished.

- **Color-coded key dates on each RO card**

Each card now shows small colored date tags so you can see timing at a glance: **blue = Drop-off date**, **amber = Promised date** (turns **red** if it's past due), **green = Pickup date**.

- **Fixed a hidden bug that erased drop-off dates**

Before, if anyone opened an RO and hit save in **Edit RO**, the **Planned Drop Off Date got wiped out** (and its reminder email along with it). That field is now on the Edit screen and stays put when you save.

- **Corrected tech names**

Zak, Rod, and Travis now show the correct last name **Wombles** (was "Wimbles") in tech assignments.

- **Cleaned up the Wishes board (admins only)**

The behind-the-scenes "wishes" / enhancement-request list now hides finished and duplicate requests by default, so it only shows what's still being worked on.

Questions or something not working right? Use the **Make-A-Wish / Enhancement Request** button on the dashboard to send it in — that's exactly how most of these updates got started. Thank you!
